Github Homework

- Create a github repository for the training
- Create a new branch and name it dev
- Then you need to make **four different commits** on the new branch
  - Create an HTML file and add your name and specialization
  - Add skills section to HTML file
  - Add a simple css file
  - Update Readme file
- Push the changes to the dev
- Open a PR from dev to (master/main) for merge
- Merge the two branches
- Add the mentors to the github repo as collaborators
